

## Manlift Ticket Prince Albert

Manlift Ticket Prince Albert - The Elevated Platforms and Manlifts Certification course helps to provide the necessary training on the work practices, safe operating procedures, rules and regulations regarding the daily activities for the operators of this machinery. The program has been designed for people who are actively involved in these activities or those who have a basic understanding of this equipment.

In the past couple of decades, manlifts and aerial platforms have become a common sight on construction job sites and in industrial maintenance applications. These machinery provide an easy way to lift employees close to what must be performed on a stable platform apparatus, allowing workers to carry out tasks with greater comfort and safety rather than being perched on top of scaffolding or ladders.

The manlift is similar to other industrial devices in that they are safe when used properly. As they elevate employees above floor or ground level, accidents could happen easily and this may lead to serious death or injuries for both the operators of the manlift as well as any passerby who may be unlucky enough to be standing below.

Manlifts come in a variety of types. Nearly all fit into 1 or 2 categories: the scissor lift, which is capable of moving up and down and the articulating boom lift, which can move both horizontally and vertically.
