

Boom Lift Training Prince Albert

Boom Lift Training Prince Albert - Aerial platforms or likewise known as elevated work platforms are devices which enable workers to carry out tasks and duties at elevated heights which will not be otherwise reachable. There are different aerial lifts on the market to perform various applications under various site conditions. If not carefully operated, elevated work platforms can cause fatality or serious injury. The most common causes of related accidents are electrocution, falls, tip-overs and crushed body parts. Lift operators should be completely trained in procedures in order to prevent accidents during the operation of lifts.

Aerial Lift Safety program is intended for individuals who should operate the devices more safely and effectively. The course provides thorough instruction about the most used lifting devices within the business.. Types of lift covered comprise articulating, boom supported and scissor aerial lifts. The video presents the right methods operators must follow. Instruction focuses on pre-operational check, protection against falls, stability of the device and safe driving procedures.

The course addresses employee safety and equipment reliability. All instructional materials are compliant with government, provincial and state agency regulations and requirements. Course management and training methods will be taught. The trainer will likewise become well versed in the technical aspects of aerial lift safety.

Parts of the Boom Lift Training course consist of both practical training and classroom training. Both sessions should be successfully finished for the participant to be given a certificate of achievement.

The difference between self-propelled elevating work platforms and self-propelled boom-supported elevating work platforms is that, on the latter type, work platforms could be positioned entirely beyond the base of the equipment. The theoretical component of the training is practically identical for both types. The practical training component could be completed sooner if only one kind of machine is utilized.

Elevating Work Platform Training Program Objectives:

Aerial Platform/Boom Lift Training provides competency requirements for safely operating Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms (for use on paved/slab surfaces). Training would help operators to make more efficient use of elevating work platforms while lessening the chances of an expensive workplace accident. Trainees will review of applicable rules and company policies, talk about Due Diligence, review Criminal Negligence and consequences to trainers, employers, supervisors and workers. Participants would study machine features, stability, operating procedures, parking and charging/fueling procedures. Site-specific safety problems will be dealt with.
