

Order Picker License Prince Albert

Order Picker License Prince Albert - Order picking is also referred to as order preparation operation. This is among the main processes within a warehouse and comprises people called order pickers, taking and collecting articles in a specific quantity previous to shipment to be able to fulfill customer orders. Order picking is an easy warehousing method. The effectiveness in which this particular task is done can be directly connected to a supply chain's productivity. Hence, order picking is amongst the most controlled logistic methods. Order picking falls within the category of the warehouse management system.

There are certain kinds of order picking which include: wave picking method, pick to box method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method involves the order picker filling the box with the items from his or her station. The box then moves to other picking locations until the client order is complete. In this method, there is no movement of the order picker staff. In the wave picking method, the order pickers move around in order to collect the needed items for several orders. The piece picking or picker to part method is similar where the order picker or pickers move to be able to gather the stuff required but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, stuff are brought to the orderpicker by an automatic system like an automatic storage system or a conveyor system. In the zone picking method, each order picker is assigned to one specific zone. They are responsible for only realizing order picking within this particular area.
