

## JLG Telehandler

JLG Telehandler Training Prince Albert - In the late 1960's John L. Grove, with his wife Cora set out on a cross country voyage in their RV. Newly retired, after spending several years working with his brother to develop their crane business into an market leader, John had no idea that fateful trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

During their journey, John reacquainted himself with past business connections along the way. In combination with these conversations and a significant event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial marketplace for a product that could quickly and securely elevate individuals in the air to accomplish upkeep and other construction functions.

Following their return from holiday, John set up a joint venture with two of his friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design essentials of that original lift into current designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into several global marketplaces and continues to develop contemporary equipment to guarantee that consumers are able to become safer and more well-organized within their workplace.
