

Clark Forklift

Clark Forklift Forklift Training - Performing worldwide, there are currently 350,000 Clark forklifts and lift vehicles in operation, with upwards of 250,000 of those operating in North America. Clark has five major lines of forklifts across the world, making it one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 particular parts intended for 20 exclusive brands of lift trucks and automated equipment. Your regional Clark Supplier is your total source for availability of all your parts requirements provided by Clark Totalift.

Clark features a exceptional Parts Supply team. The items warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing companies. Motivated to provide the highest level of value and service to our users, Clark remains on the leading edge when it comes to improving output and benefiting performance.

Globally, Clark has one of the most amazing dealer support networks. With over 550 locations globally, dealer representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the material handling market.

Clark proudly remains an innovative leader of the material handling industry, pioneering protection features such as the operator restraint system. This exceptional commitment to safety is currently a standard feature on every forklift.

Clark has a unyielding mission to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its manufacturing plants. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental limitations, thus placing them in a prevailing industry position.

Supply Efficient Production

Clark has chosen the system of "Lean Manufacturing" at all of its assembly plants because this technique is extremely economical and allows for minimal use of resources. Developed to ensure maximum proficiency, this system is intended to find and acknowledge the most efficient methods for production plant management. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engine Design

Clark's product engineers and suppliers join together to upgrade the proficiency and excellence of their merchandise while minimizing expenses. The contemporary value engineering agenda combines progressive product development and delivers superior consumer support and service within the industry.
